

CRYPTO MONDO World

Solution Features

- Wizard Setup
- Utilizes Data Dictionary
- Field Level Security
- Minimal Customization
- Automated

Solution Benefits

- Ease of Use
- Improved Risk Management
- Improved Audit Trails, Reporting & Compliance

Requirements

- World A7.3, A8.1 A9.1, A9.2
- Linoma Crypto Complete 1.52+
- I5/OS V5R3+

World users can now breathe easy.

Crypto Mondo uses the innovative and proven technology of Linoma's Crypto Complete to bring automation to encrypting your sensitive data.

Streamlined Setup

- 'Work With' screen allows users to easily determine what fields have been encrypted
- Wizard establishes field, file and environment
- Designated users create and activate field encryption without exposing System I command menus/lines
- Integrated symmetric key management

Protect Your Data

- Rotation of encryption keys without having to re-encrypt existing data
- Social security numbers, account information, credit Card numbers
- Compliance with Advanced Encryption & Data Encryption Standards

"Crypto Mondo is a cost-effective solution to use with Linoma's Crypto Complete. It is easy to set up with the look and feel of JDE code."
